

The Advanced and Difficult Airway Course

Need Airway Training? Want to master your skills? Our advanced and difficult airway management course is designed just for you!

The Total Course

This program covers everything from airway assessment to planning your management approach. Our detailed presentations will teach you how to identify difficult airways and plan for the worst.

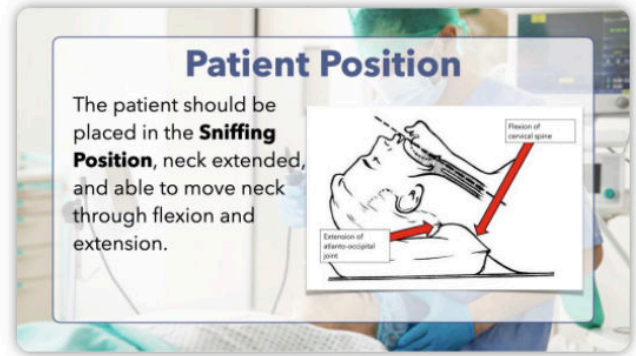

Basic and Advanced Skills

Learn the ins and outs of basic and advanced technique. Apply your skills in a variety of patient scenarios involving management decisions and algorithms.

Learn with the Best

Detailed tutorials including video and audio reinforce key topics. Our program highlights some of the common challenges and pitfalls for difficult airway management. Our expert team will show you the right way!

Become a Master

Different airway management approaches are taught in an organized fashion, and stress management of each type of clinical situation. Become a master of the basic, difficult, crash, and failed airways and their management!

Learn it Live - Hands On!

Live 1-day courses are available for you to experience the entire course, and practice hands-on with the latest technology. This program can be combined with our 2-day clinical skills and procedure workshop for the ultimate learning experience!

Thursday Advanced and Difficult Airway Workshop Schedule

Airway Anatomy and Assessment	<ul style="list-style-type: none"> How to assess an airway Identification of landmarks Predicting a difficult airway Special scenarios Airway classification and grading
Indications for Airway Management	<ul style="list-style-type: none"> Clinical conditions Respiratory status Anatomy Predictors of airway need Common Approaches
Invasive and Non-Invasive Airway Management	<ul style="list-style-type: none"> Escalation of intervention BIPAP CPAP Endotracheal Intubation Airway Adjuncts
Airway Options and Medications	<ul style="list-style-type: none"> Types of airway devices Airway Equipment Laryngoscopes Fiberoptic and Video Scopes Induction Agents and Dosing
Induction and Intubation	<ul style="list-style-type: none"> Procedure organization and setup Stepwise airway protocols Anatomy Endotracheal Intubation Hands-on Procedure Practice
Tube confirmation and Difficult Airway management	<ul style="list-style-type: none"> Confirmatory tests Defining an intact airway How to manage a failed airway Difficult airway algorithm and management Fiberoptic laryngoscopy Laryngeal mask airway Video laryngoscopy
Difficult Airway Algorithm and Simulation	<ul style="list-style-type: none"> Application of the difficult airway algorithm Simulated patient scenarios Intubation with video laryngoscopy Hands-on airway procedure lab Individual review with instructor

1-Day Live Program (Thursday)

Includes 10 airway modules with live instruction and individualized training

Learn airway management and hands-on skills

Morning lectures matched with afternoon Airway Workshop

Hands-On Workshop includes:

Direct Laryngoscopy with Laryngoscopes

Video Laryngoscopy

Difficult Airway Simulation

Expert Clinical Instructors!

What's Included in the Program

- 10 Category I CME credits from the AAPA
- 8.5 emergency procedure hours + 1.5 pharmacology hours
- Tuition for **one full day of live education**
- High quality lectures
- **Hands-on procedure workshop**
- Airway simulation with actual equipment, hardware, and devices
- An individualized difficult airway simulation
- **Lunch**
- **Discounted hotel rates are available during registration**

8:00am to 5:00pm Thursday
